My DEAR SIR: I have this day read your letter directed to my friend Mr.

From Theodore Roosevelt's illustrated paper on "Frontier Types," in the October Century, we quote the following description of one of his trappers, a French Canadian: "Once or twice he showed a curious reluctance about allowing a man to approach him suddenly from behind. Altogether his actions were so odd that I felt some curiosity to learn his history. It turned out that he had been through a rather uncanny experience the winter before. He and another man had gone into a remote basin, or inclosed valley, in the heart of the mountains, A NARROW ESCAPE. who will bring in 1300 & fill us to overflowing—Our church membership is 400—we want a membership not less than 1200—We think with God's help & the right man—who is a good operative force——& there is material in abundance—needing to be square-heved & numbered for the building. Will you please give me the exact measurement of Mr.——(confidentiall if you say so) that is to say valley, in the heart of the mountains, where game was very plentiful; indeed, it was so abundent that they decided to pass the winter there. Accordingly they put up a log-cabin, working hard, and merely killing enough meat for their immediate use. Just as it was finished winter set in with tremendous now storms. Going out to hunt, in the first lull, they found, to their consternation, that every head of game had left the valley. Not an an

was to be found therein; they had abandoned it for their winter haunts. The outlook for the two adventurers was appalling. They were afraid of trying to break out through the deep now-drifts, and starvation stared hem in the face if they staid. The man that I met had his dog with him. They put themselves on very short ommons, so as to use up their flour as slowly as possible, and hunted unweariedly, but saw nothing. Soon a

for suffering humanity has become tired of modern doctoring and the public has great confidence in any remedies put up by the firm of which H. H. Warner is the head. The people have become suspicious of the effects of doctoring with poisonous drugs. Few realize the injurious effects following the prescriptions of many modern physicians. These effects of poisonous drugs, already prominent, will become more pronounced in coming generations. Therefore we can coadially wish the old-fashioned new remedies the best of success.

THE citizens who signed the letter of protest to W. S. Heger, Secretary of the Electric Light Co., have received a reply which substantially brushes aside the points made by the petitioners, and while courteously, yet firmly insists on their position, as taken in their late announcement. Now it seems to us that the whole trouble in the matter, setting aside the question of the past, is the arbitrary way in which the company propose to substitute a more expensive light, without consultation with their customers, most of whom agree in the fact, that if the present 10 candle power burner be brought to its proper capacity, the amount of light generated will be amply sufficient for their needs. The arguments made by Mr. Heger on this point tending to show an increased creased light are weak, and would be unapplicable at any rate, since it is evident that our citizens do not want the increase, can't afford it. After a careful looking over the subject, we will venture to tell the company what we think customers do want and will sum it up under three heads.

1st. A good 10 candle power light. with power enough to keep it up to the required capacity. 2nd. The lights to be turned on at such time as is made necessary by failing daylight. Just in this connection, we wish to say that usually they are about 15 minutes late in this particular. 3rd, and lastly, That individual customers be given the same reduction, that the Town is given when upon application it is admitted that the service has not been up to contract requirements.

In the last issue of Printer's Ink, a journal devoted to tne interest of the an attempt on the part of a publisher of one of our north western weeklies to impose on the advertising and general public by grossly mis-stating his circulation. The exposure was brought about by an offer on the part of Geo. P. Rowell & Co., publishers of the American Newspaper Directory, to pay \$100.00 to any one furnishing conclusive evidence of a mistake in the quotation of any paper's circulation. A former foreman of the office of the paper referred to, made affidavit that the circulation was not over 2800 to 3000, while the Directory gave it as 4000. After considerable correspondence, the Publishers of the Directory, paid the informer the money. It is amusing, at the same time instructive. to read the views of some hundred different journals, as to the conclusiveness of the evidence furnished; but the large majority concur in the verdict, that the case was made out, quite as much by the subterfuges and evasions much by the subterfuges and evasions of the suspected Journal's proprietor, as by the directness of the testimony furnished by the ex-foreman. There is a moral attached to this lesson, namely, that since there seems to be a propensity on the part of many publishers to overate the importance of their publications by misquoting their circulation, some plan should be devised, that should put it out of the power of visionary publishers to cheat power of visionary publishers to cheat and hood-wink their patrons while their more truthful fellows are from the same cause left out in the cold.

To those gentlemen who seem to delight in writing long winded communi-cations to the bolting Delawarean, and the different Republican Journals of Wilmington, with a desire to defeat the Democratic Ticket in Kent County, we would say that we think they have accomplished their object. Not just exactly in the way they intended, for it has been done at the cost of the political respect, had for them by the faithful of both parties. Still they have, or robably will have, their triumph, and we trust they are satisfied.

WE have made several apologies since assuming control of THE TRAN-SCRIPT, and this week is no exception. The press of advertisements that have come to us during September has neessitated our encroaching on our space for reading matter until we feel slightly ashamed of ourselves. The different Fairs, Circuses etc., compelled us last week, to do more than this, namely to leave out one or two of our namely to leave out one or two of our advertisers whom we thought we could arrange with. This week it is nearly as bad, but we think we will by next week get down to our regular routine. We can only say in extenuation that our readers may glean some information from our numerous ad's that may be of service to them, as well as some of the regular reading matter. At the same time we would call their attention to the great demand for space in our columns, in support of the fact that we are looked upon as one of the best advertising mediums on the Peninsula.

The Republicans are certainly hard
up for campaign material when they
attempt, as they are doing, to make
the public believe that Gen. Benet,
Chief of Ordance U. S. Army, has
been violating the civil-service law by
issuing a political circular. The circular in question was sent to the commandants of arsenals and armories in
1886, and was strictly in the line of
civil service reform, as it instructed
the various commanders to so regulate
employing and discharging of employes
asto divide them about equally between
the two parties, in other words, Gen.
Benet wanted the employes of the War
Department to be non-partizan.

Senator Gibson, of Louisiana, ably defended his State from the aspersions cast by the resolution of "Little Billy" Chandler proposing an investigation into the late State election. Mr. Gibson called attention to the fact that no citizen of Louisana had ever petitioned to have this investigation made. He also alluded to the fact, which has become notorious, of these investigations always being proposed just before an important Congressional or Presidential election is to be held. In the last allusion the Senator struck at the heart of the bloody shirt business. Few people have any idea of the enormous growth of the Railway Mail Service. Here are a few figures used by Representative Blount, of Georgia, in a speech last week on a bill to increase the salary of the Superintendent and providing for an assistant-superintendent. In 1879 mails were carried over 79,000 miles of railroad; in 1887 they were carried over 107,000 miles. they were carried over 107,000 miles. In 1879 the number of pieces of mail matter handled by postal clerks was 2,659,000; in 1887 it had increased to 5,851,000.

The majority report of the Utah commission is against the admission of that Territory, until the Mormons shall give evidence by their acts that they have in good faith abandoned polygamy, and not then until an amendment shall have been added to the Constitution of the United States prohibiting the practice of polygamy. Owing to the continued illness of Senator Beck, there has been some little delay in the preparation of the minority report which is to accompany the Republican tariff bill when it is reported to the Senate. The report is

being made up by Senators Harris and Vance, and they hope to have it com-pleted by the middle of the week. Chief Justice Fuller and family have arrived here and have taken pos of the house he has leased for a year.
The new Chief Justice will be sworn in next Monday and will take part in the opening of the fall session of the Supreme Court on that day.

The October Century closes the 36th volume and 18th year of that periodical. The frontispiece of that number is a portrait of the late Emma Lazarus, the Jewish poet of New York; and in the body of the magazine appears a sympathetic study of the genius and personality of this most interesting woman.—The Century for October.

study of the genius and personally of this most interesting woman.—The Century for October.

The October number of Belford's Magazine keeps well up to its mark. The complete novel is a brilliant and interesting love-story, entitled "The Shadow of the bars," by Earnest De Lancy Pierson, author of "A Slave of Circumstances," one of the most promising of the rising authors on the New York Press.—Belford's Magazine.

The excellence of Harper's Magazine for October is apparent even from a hasty glance through its pages. There are short stories and long ones, sketches, "akits," poetry, and unsurpassed illustrations. The articles most striking, perhaps, are Mr. Theodore Child's "Limoges and its Industries," and Z. L. White's descriptions of "Western Journalism." These contain a great store of new information, and even the old facts are so presented that they strike the reader with new force. The portraits of Western editors will be scanned by the public with interest.

Charles Dudley Warner's paper in

Harper's Magazine for October on "The
Great West" is full of interesting matter
concerning St. Louis and Kansas City,
It is not made up of statistics, although it
abounds in that species of information
so dear to the Western business man's
heart; there are opinions, and descriptions from every point of view. No one
will be surprised to hear of the tremendous prosperity of these places. It is
known throughout the Union to be marveilous, with the end not yet in sight.
Nearly every one in the East will be surprised, however, to learn that while Kansas City is not in Kansas, neither can it
be said to be in Missouri—it is in both
States. In fact Kansas City, Kansas, is
is one place, and Kansas City, Kansas, is
is one place, and Kansas City, Missouri,
another. Trivialities like this will be
corrected when the people out there get
time. The attention of thoughtful Eastern readers is especially directed to what
Mr. Warner has to say about education in

to the guillotine."

At these words, Charlotte drew from
her bosom the knife, and plunged it
with supernatural force up to the hilt
in the heart of Marat.

"Come to me my dear friend, come to
me," cried Marat, and expired under

What a lesson in this tragic story!
Two hundred, nay, five hundred thousand people would Marat have sacrific-

sand people would Marat have sacrificed to his unholy passion of power!

Methods are quite as murderous and inexorable as men, and they number their victims by the millions.

The page of history is full of murders by authority and by mistaken ideas! In the practice of medicine alone how many hundreds of millions have been allowed to die and as many more killed by unjustifiable bigotry and by bungling!

But the age is bettering. Men and methods are improving. A few years ago it was worth one's professional life to advise or permit the use of a proprietary medicine. To-day there are not two physicians in any town in this country who do not regularly prescribe some form of proprietary remmedy!

A Horse Who can Talk.

Everybody has heard of a "horse laugh," but who has ever seen an equine gifted with the power of speech? Such an animal would be pronounced a miracle; but so would the telegraph and the telephone have been a hundred years ago. Why, even very recently a cure for consumption would have been looked upon as miraculous, but now people are beginning to realize that the disease is not incurable. Dr. Pierce's Golden Medical Discovery will cure if, taken in time. This, world-renowned remedy will not make new lungs, but it will restore diseased ones to a healthy state when all other means have failed. Thousands can gratefully testify to this. All drug-

The Swift Specific Co., Atlanta, Ga.;
Gentlemen—Seven years ago I contracted an exceedingly bad case of blood poison. I tried a physician, the best at command, but secured no benefit. My throat began to get sore, and my body covered with sores and ulcers. Going from bad to worse, I felt that my grave must be reached in the near future. I gave up the doctors' treatment, and with a despairing hope I commenced taking your medicine. I began to improve from the first bottle, and in a short time the ulcers healed, and my skin cleared off and was entirely well.

One year ago a case of catarrh developed in my system. The physician did his best, but could not cure me; but two bottles of Swift's Specific gave me permanent relief.

MUSTANG LINIMENT

MEXICAN MUSTANG LINIMENT, Pefuscles to the Very Bone! Wonderful!

End of the Peach Season Only once since the first peaches wer ipped to the market by the Reybolds in the forties has the crop of this year been exceeded, and never in the history of the growth of the fruit has the profit realized

rceeded this year's.

The season closed with yesterday's shipnents and a total of 5921 cars. The fruit tself has not been as good as in former years. The season opened July the 10, when the first complete car of peaches passed over the Delaware Division, bound for Philadelphia. It reached its greates height on September 1, when 260 cars were shipped to 65 different points.

The number of baskets that the total crop

has yielded will come within the famous crop of 1875 when there were 10,000,000 bascets. The 5,957 cars is equal to about 3,400-000 baskets. At least 1,500,000 baskets went to Baltimore and other southern points evaporators and canneries and in making s grand total of 2,900,000 baskets. It is timated that the crop netted the growers on the average 45 cents a basket after all expenses had been paid and this put into the pockets of the growers on the Peninsula the enormous sum of \$2,655,000, a sum which it would be impossible for five times the same number of acres of wheat to yield. Had it not been for the bad September weather from the crop. Another singular thing about the season is that not once did a glut occur in either the Philadelphia or New Much of the credit for this is said to be due to the Bureau of Distribution. The Exchange at Wyoming did more business that

ADVICE TO MOTHERS.—Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth? If so send at once and get a bottle of "Mrs. Winslow's Soothing Syrap" for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers there is no mistake about it. It cures Diarrhoca, regulates the Stomach and Bowels, cures Wind Colic, softens the Gums, reduces infiammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup"," and take no other kind.

The Peach Bureau. We are assured in a semi-official way that the success of the bureau this season has been such as to raise flattering hopes for its suc cessful operation next year. Experience has suggested some changes which will materially benefit the plan. For example it is found various interests, the different commision nen will not be interfered with in their 3 per cent. commission, while they will register and ship through the buerau as other shippers This is, so far as we can see, a wise move from the middle men it proposes to give to gives to all others. We have not at hand t this time the statistics to show what advan

tage the bureau has been to the Peninsula and it ought to prove of increasing advantage and efficiency each year.
